# SIP2

## Self Installing Platform

### Type 2

If you're looking for a fast track, cost efficient, and easily relocatable platform which can be installed without the use of a heavy lift vessel, the SIP2 is the solution.

#### Product characteristics

- Four legged platform founded on suction piles
- Topsides weight up to 15,000 ton
- Water depth up to 60m
- Up to 4 conductors protected in the platform legs

#### Benefits of the SIP2

- **Proven** proprietary technology with 9 successful SIP2 installations and 3 relocations
- Offshore **installation** in less than **52 hours**
- Platform can **easily be relocated**, spreading CAPEX
- **No heavy lift vessel required**, improving schedule flexibility and reducing costs
- **Fabrication costs are reduced significantly**, since no pile sleeves, -catchers, -centralizers, mud mats and leveling padeyes are required
- **No pile drive-, leveling- and grout spread and operation required**
- **Noise free** installation, relocation and removal
- **Cold commissioning** can be performed **onshore**
- **Engineering and installation by one party**, hence SPT Offshore takes over installation and in-situ **responsibility**

#### Fabrication, transportation and installation

Installing legs into topsides

Tow to field and position

Lower legs and install suction piles

Lift deck and remove barge

#### SPT Offshore track record for SIP2

ConocoPhillips Calder

Centrica F3FA

ConocoPhillips Millom West
